

**A** habitat is where an organism makes its home. Habitats have everything that a living thing would need to survive! Today you explored one type of habitat. Maybe it was the beach, or a marsh, or a local park. These are all different habitats where animals live. What other habitats can you think of? What is your own habitat? Below, write down the things you need to survive in your own habitat.

---

---

---

Where might you find each of these birds? Draw a line to connect the bird to their **habitat!**

Redwinged Blackbird

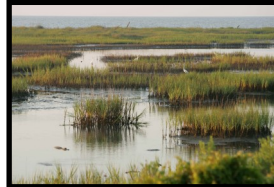

Black-capped Chickadee

Piping Plover

Snowy Egret

**In this box, draw your favorite bird you saw in its habitat!**

# Birding Observation Sheet

Use this sheet to help track your birding! See how many birds you can see sitting, walking, preening (cleaning their feathers) or flying! What else did you **observe** birds doing? \_\_\_\_\_
